

# OASIS™ WSP

## Lake and Pond Colorant

NET CONTENTS: 148 grams per packet

**ACTIVE INGREDIENTS:** Dye, coupling agents & inert Ingredients.....100%

### GENERAL INFORMATION

OASIS WSP (Water Soluble Packets) is a flexible, concentrated non-toxic water colorant. It creates a beautiful natural appearance for lakes and ponds. This product is an excellent complement to the already existing beauty of golf courses and park fountains.

### CAUTION: KEEP OUT OF REACH OF CHILDREN

Avoid contact with skin, eyes and clothing. Do not take internally.

### PRECAUTIONARY STATEMENT

Do not use in water that is expected to be consumed by humans. OASIS WSP is safe for swimming after complete dispersal. Use OASIS WSP only in water bodies that have restricted flow. Wear eye protection and rubber gloves when handling or using OASIS WSP.

### STORAGE AND DISPOSAL

Do not expose the solupaks to moisture or water before use or else the solupak will start to dissolve. Dispose of outer packaging material according to provincial and federal regulations. Store above 0 °C to prevent freezing. DO NOT FREEZE.

### APPLICATION RATES

Apply one – 148 gram solupak of OASIS WSP per 1250 m<sup>3</sup> (1,248,700 L). This is equivalent to (one) 1 acre-foot. Water volume can be determined using the following formula: pond length x pond width x average depth.

After calculating the water volume, drop the appropriate quantity of OASIS WSP into the lake or pond. OASIS WSP will diffuse evenly, dispersing with currents and normal water movement. To ensure diffusion throughout the entire lake or pond, carefully drop the required number of solupaks of OASIS WSP at different areas in the lake or pond.

OASIS WSP is safe to fish and aquatic species, waterfowl, wildlife and pets. It is a non-corrosive dye and when used according to recommended rates, may cause temporary staining but will fade over time once the product is removed or allowed to dissipate. This applies to stone, fountains, approved aquatic features or swimwear. OASIS WSP will stain rocks, decking and other porous surfaces if spilled or applied as a concentrate.

OASIS WSP is a high quality aquatic dye that will be oxidized and degraded by chlorine, which will diminish dye concentration and lake or pond coloration. In non-chlorinated systems or lakes and ponds, OASIS WSP is broken down gradually through biological and photo degradation. Coloration is also reduced through the natural process of dilution (i.e. addition of fresh water to the lake or pond). The original colour level should be effective for 2-4 weeks, depending on the lake or pond system. Chlorinated systems typically require additional OASIS WSP within 2 weeks while biological and photo degradation is common within 4 weeks. To return the beauty of the lake or pond colour to its intended coloration level, simply add small amounts of OASIS WSP from time to time. This will offset the chlorination or natural bleaching that occurs in every dyed lake or pond environment.

### FIRST AID

**Inhalation:** Move victim to fresh air. Give artificial respiration ONLY if breathing has stopped. Give cardiopulmonary resuscitation (CPR) if there is no breathing AND no pulse. Obtain medical advice **IMMEDIATELY**.

**Skin contact:** Flush skin with running water for a minimum of 20 minutes. Start flushing while removing contaminated clothing. If irritation persists, repeat flushing. Obtain medical attention **IMMEDIATELY**.

**Eye contact:** Immediately flush eyes with running water for a minimum of 20 minutes. Hold eyelids open during flushing. If irritation persists, repeat flushing. Obtain medical attention **IMMEDIATELY**.

**Ingestion:** If victim is alert and not convulsing, rinse mouth out and give 200-300 mL (1 cup) of water to dilute material. If spontaneous vomiting occurs, have victim lean forward with head down to avoid breathing in of vomitus, rinse mouth and administer more water. Obtain medical attention **IMMEDIATELY**.

### WARRANTY

Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability of fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to the seller, and the buyer assumes the risk or any such use.
